## MOLD-SEWER-WATER LOSS EVALUATION AND MANAGEMENT

The potential liabilities and health concerns associated with water damage, sewage loss and associated mold growth have greatly increased in recent years. Mold amplification within a facility or residence can result in building damage, ventilation issues, and possibly contribute to health concerns. To address these concerns, AGW provides technically sound, reliable, and practical solutions to our Clients' water damage and mold issues. Our team of industrial hygiene professionals has earned a respected reputation by providing expert investigation, project design, remediation oversight, testing, and related services at reasonable costs

- Comprehensive mold and moisture investigations
- Remediation project design, coordination, oversight
- Air and surface mold and bacteria sampling
- Expert witness testimony
- Concurrent asbestos investigation and management capabilities

AGW also has expertise in engineering, asbestos inspection/management, air quality, and regulatory compliance allowing us to effectively identify and address complex problems. This is why AGW's Clients include individuals, corporations, builders, insurance companies, law firms, schools, and government agencies.
