## CONSTRUCTION OBSERVATIONS COMMERCIAL, INDUSTRIAL, AND SCHOOL FACILITIES

A. G. Wassenaar, Inc. understands the demands of commercial, industrial, and school facility construction. In general, time is of the essence and milestones are critical to maintain in order to keep the project on schedule. Quality must be assured in this fast-paced environment. Our services assist the Owner in knowing that design, construction and materials were in conformance with contract documents. In addition, we can assist other design professionals in proper material selection. Our observations and testing services include:

- Soil Testing
- Concrete Testing
- Masonry Special Inspection and Testing
- Reinforcing Steel Observations
- Post-Tensioning (Pre-Pour to Elongation Measurements)
- Pier Drilling Observations
- Excavation and Footing Observations
- Void and Foundation Drain Observations
- Sprayed on Fire-Proofing (Thickness and Density)
- Moisture Vapor Rate (Flooring Installation)
- Asphalt Testing
- Structural Steel Erection

Whether the project is a \$50 million high school or a retail pad building, the highly qualified staff at A. G. Wassenaar, Inc. can assist our Clients in properly constructing their project.
