

A.G. Wassenaar **Inc.**

CONSTRUCTION OBSERVATIONS MUNICIPAL/INFRASTRUCTURE PROJECTS

Municipal and infrastructure projects are a unique type of construction that can require a flexible testing laboratory. Typically, these types of projects are funded by tax dollars and budget is a critical matter. If the budget is tight, we can discuss where to best spend the monies allocated. A. G. Wassenaar, Inc. currently has numerous municipal Clients. We understand the unique aspects of reconstructing a road in a residential, commercial or industrial area. We can present options that expedite the process. Whether it is an interstate electric transmission line or a sanitary sewer replacement project, the personnel at A. G. Wassenaar, Inc. dedicate ourselves to being an asset to the project.

- Annual Capital Improvement Projects
- On-Call Maintenance or Repair Projects
- Water and Sewer Replacement Projects
- Specific Site or Building Projects (Recreation Centers, Municipal Building/Facilities, etc.)
- Transmission Lines
- Intergovernmental Projects (Shared Costs)

A. G. Wassenaar, Inc. has also provided educational seminars to municipal employees that provide direct answers in a more relaxed environment. This experience provides us a unique look at the true needs of a specific municipality.
